“What Makes Our Test Equipment Superior”

Flexible Fuel Cell Test Stand

The next generation design of the PDS Test Stand includes several novel equipment enhancements, utilizing the latest technology for equipment design as well as many new features. PDS will be re-engineering modules such as the humidification module. The current bubbler or sparger technology humidification method varies greatly in Relative Humidity at varying flows, and is dependant upon chilled water input, temperature and flow fluctuation. For more information on PDS and our advanced fuel cell testing systems, please contact Bill West at 585-426-4500 or
